EXPERIENCE

Full Stack Web Developer | Oomami, Inc. - San Francisco, CA | Feb 2016-Nov 2016

As a full time employee, responsibilities include working on the web application, company website, administrative website, company API, as well as the job server and other microservices. Some of the projects completed during this time include:

- Created web version of Oomami's iOS application with AngularJS.
- Worked on a team with product managers, developers, and designers.
- Refactored existing Job Server to handle Apple push notifications, cache, and emails.
- Built an infinite loading cascading grid to display user image uploads to Oomami's platform.
- Implemented Facebook OAuth mechanism on both AngularJS and React applications.
- Built dynamic templates on the web client server for SEO optimization of web application.
- Created Oomami's administrative web application with React & Redux.
- Built the admin website's tools to manage restaurant data, users, and flagged media.
- Implemented Mapbox to display restaurant geolocation pins for user restaurant lists.
- Built lazy loading of restaurant media for rendering and performance improvement.
- Set Grunt task runner to build production files and deploy application.
- Designed and implemented API to process a user's iPhone contacts in order to show them when their contacts joined the platform as well as contacts who have already joined.
- Implemented API to store actions for a notification feed using DynamoDB.
- Expanded the API's test suite of unit and integration tests using Mocha, Chai, and Supertest.

Full Stack Web Developer | General Assembly - San Francisco, CA | Sep 2015-Dec 2015

Attended a 12-week immersive web development course. Learned both front and back end skills. Developed multiple projects, including various team projects, learning proper version control and flow. Some of the technologies used in the projects were: AngularJS, Rails, MongoDB, PostgreSQL, Github, Heroku, jQuery, Bootstrap, Node.js, and Express.

Operations Manager | ALVA Lighting - Berkeley, CA | Jun 2014-Sep 2015

- Responsible for ALVA's full website redesign, defining aspects of user experience and site flow.
- Implemented the company's production planning, inventory, and order processing systems; which facilitated a 500% sales growth, and turned ALVA into a multi-million dollar company.
- Managed accounts receivable and payable, commissions, and cashflow analysis reports.
